Bengaluru, Karnataka, India

PROFESSIONAL SUMMARY

Full-Stack Developer with 3 years building scalable, high-performance web applications using React.js, Angular, Next.js, ASP.NET, and C# for government and enterprise clients. Led full-stack delivery for the PM Kisan Yojana portal serving 10M+ beneficiaries on .NET-based infrastructure. Experienced integrating AI/LLM capabilities (OpenAI API, Claude Code, RAG-based assistants) into production applications. Skilled in component architecture, state management, RESTful API integration, Agile/Scrum workflows, and accessibility-first (WCAG) UI development. Seeking Frontend, Full-Stack, or AI-integrated Developer roles to build impactful, user-centric products.

TECHNICAL SKILLS

Frontend: React.js (Hooks, Context API), Angular 14+, Next.js 13, TypeScript, JavaScript ES6+, Angular CLI, HTML5, CSS3
Languages: JavaScript, TypeScript, C#, Java, Python
Backend/Frameworks: ASP.NET / .NET Core, Node.js, Express.js, RESTful APIs, GraphQL
UI/Styling: Tailwind CSS, Material-UI, Bootstrap, Styled Components, SASS/SCSS, Responsive Design, Cross-browser Compatibility
State & Forms: Redux Toolkit, React Hook Form, Context API
Visualization: Chart.js, Recharts, ApexCharts
Testing: Jest, React Testing Library, Jasmine, Unit Testing, 80%+ Code Coverage
Databases: MySQL, PostgreSQL, SQL Server, Firebase
AI/LLM: OpenAI API, Claude Code, Prompt Engineering, RAG Pipelines, AI-Assisted Development & Code Review
DevOps & Tools: Docker, CI/CD, AWS, GCP, Azure, IIS, Git, Webpack, Babel, NPM, VSCode, JIRA, Agile/Scrum, Kanban

PROFESSIONAL EXPERIENCE

Software Developer — Frontend / Full-Stack <i>Tibil Solutions</i>	Dec 2023 – Present <i>Bengaluru, Karnataka</i>
- Built and maintained scalable full-stack web applications for government and enterprise clients using React.js, Angular, Next.js, ASP.NET, C#, Node.js, and Tailwind CSS following Agile/Scrum methodology - Led full-stack development for PM Kisan Yojana portal serving 10M+ beneficiaries, delivering dynamic forms, dashboards, and registration modules built on ASP.NET/C# and deployed on IIS-hosted virtual machines - Engineered reusable component libraries reducing development effort by 40% and enforcing UI consistency across 4+ concurrent projects - Integrated AI-powered features (OpenAI API, Claude Code) into client applications for automated content generation, query handling, and developer productivity tooling - Optimized application performance achieving 90+ Lighthouse scores and 35% reduction in page load times through code splitting, lazy loading, and image optimization - Implemented cross-browser compatible, WCAG-accessible UI layouts; integrated RESTful APIs and managed application state with Redux Toolkit and Context API - Conducted code reviews, mentored 2 junior developers, and collaborated cross-functionally with design, backend, and QA teams in sprint-based delivery cycles	

KEY PROJECTS AT TIBIL SOLUTIONS

PM Kisan — Beneficiary Management Portal <i>ASP.NET, C#, SQL Server, IIS, Virtual Machines</i>	Government of India
- Built and deployed an ASP.NET/C# web application enabling 10M+ users to access PM Kisan scheme information and complete registration workflows, reducing support queries by an estimated 30% - Deployed and managed application on IIS-hosted virtual machines with CI/CD pipelines, achieving stable production delivery and seamless API integration - Optimized database queries and server-side logic, improving form submission and page response times by 45%	
Consolidated Insights <i>React.js, TypeScript, Python, FastAPI, OpenAI API, RAG</i>	AI Analytics Platform
Architected interactive UI components for multi-step AI query submission, result visualization, and agent-based response handling, reducing user task completion time by 25%	

- Implemented OpenAI API-based query processing and retrieval-augmented response generation, improving answer relevance for end users
- Led a team of 3 frontend developers to achieve **80% code coverage** with Jest and React Testing Library, improving release stability and reducing regression bugs
- Designed scalable component architecture with clean separation of concerns, enabling the team to onboard new features **2x faster**

Leap

Learning & Development Platform

Angular.js, TypeScript, Tailwind CSS, Node.js

- Built an end-to-end interactive learning platform with course management, progress tracking, and assessments using Next.js SSR, improving page load speeds by **40%**
- Developed a reusable, accessible (WCAG 2.1) component library with Tailwind CSS adopted across **5+ modules**, cutting UI development time by **30%**

AI Coding Mentor

AI-Powered Mentorship Platform

React.js, Next.js, TypeScript, Tailwind CSS, OpenAI API

- Built an AI-driven mentorship platform using the OpenAI API to deliver personalized, context-aware coding feedback and learning paths
- Implemented Next.js server-side rendering and React Server Components improving initial page load performance by **60%** and Core Web Vitals scores significantly
- Developed fully accessible, cross-device compatible layouts using CSS Grid, Flexbox, and Tailwind CSS adhering to WCAG 2.1 guidelines across all major browsers

EDUCATION

JAIN Institute of Technology, Davanagere

Davanagere, Karnataka

Bachelor of Engineering in Computer Science | CGPA: 8.19 / 10

2019 – 2023

- Relevant coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Software Engineering, Object-Oriented Programming

CERTIFICATIONS & ACHIEVEMENTS

MERN Stack Development — JSpiders | 2023

Spot Award — Tibil Solutions, for exceptional delivery on PM Kisan Yojana portal (2024)
